Individuals experienced
improved home energy
efficiency and/or energy
burden reduction

At the heart of our mission is the vision of a world without poverty, where every individual and family has the opportunity to thrive. Our programs are the essential pieces of a larger puzzle, each designed to work in harmony to create a strong, supportive community.

Our **Youth Services Program** focuses on empowering young children through young adults with the financial support and educational resources they need to succeed.

Through our **Supportive Services**, we provide families with vital resources, including case management, educational support, and essential items like food and toiletries.

Our **Weatherization and Healthy Homes Programs** collaborate to ensure that homes are not only safe and comfortable but also energy-efficient. By reducing the financial burden of home maintenance, we help families save money, allowing them to allocate more resources toward meeting their everyday needs.

Together, these programs work in unison to build a stronger, more resilient community.

424

Individuals experienced better health and safety as a result of improvements in their home, such as the reduction or removal of harmful contaminants, fire hazards, electrical issues, and more.
